1-Outlet Surge Protector

The Belkin Connect Family

Connect surge protectors protect your connected devices from damage resulting from voltage fluctuations and surges in electricity, such as lightning strikes and power failures. Surge protectors can prevent costly repairs and loss of valuable data in the event of a surge and prolong device life expectancy by blocking smaller fluctuations over time. A Connected Equipment Warranty protecting connected devices provides added peace of mind.

The Belkin Difference

- Pioneer in innovation and technology for 40 years

The Belkin Connect Family Characteristics

- Three-line AC protection (hot, neutral, ground)
- Multiple protected ports

Belkin 6-point safety system

- Overvoltage protection
- Clamping voltage protection
- Three-line AC protection (hot, neutral, ground
- Glow-Wire tested at 850°C
- Surge-protection indicator)
- Not-grounded indicator

SKU#:SRA010au

*Belkin will repair or replace electronic devices damaged by an electrical charge while properly connected to this charger, up to $30,000AU. Visit belkin.com/cew for details.

Important: Be sure to regularly check the light on your surge protector. If the light is not on, the surge protector may have absorbed excess voltage from an event such as a thunderstorm or power outage. It may no longer be protecting equipment that is connected to it, and you should immediately replace it with a new surge protector. If you use the surge protector when the light is not on, your warranty will be invalidated. In any case, we recommend replacing a surge protector after three years of use, even if the light continues to come on.
